

NEELOV VALENTYN EVGENIEVICH

UI/UX DESIGNER

I specialise in UI/UX design for web and mobile applications. At the formative stage in this field, I strive to bring ideas to life, creating not only aesthetically pleasing but also functional solutions that simplify users' everyday tasks. I am involved in design at all stages: from problem analysis and prototyping to developing visual style and implementing it into a user-friendly and intuitive product. Let's work together to create innovative solutions that will delight and benefit your users.

PROJECT EXPERIENCE

Optigamer

A site to find your new chair, with its advantages, with the appearance of chairs, description of chairs, choosing your chair by price, quality, color, videos about the products on the site, gallery, reviews and application to create your own chair with your own design.

Cafe Carolina

Site for ordering food at home, for booking a table, types of food, cost, cooking time, weight, short description and location, coming to the cafe, you can through the site to choose and order your favorite dish.

Events

An application for concerts, where the date, place, time are indicated, all future events are also indicated, you can also start a conversation with other users or find the concert location on the map
